

Updates coming to the EROAD Ehubo

A few improvements are coming to the Ehubo. You'll see new Hours of Service counters, new remarks when changing duty status, and an overall smoother user experience.

Drive screen counter

You can now view 1, 3, or 4 Hours of Service (HOS) counters on the Ehubo drive screen. When stopped, **tap the circle icon in the bottom right corner to switch views.**

1 counter: This view always shows the counter with the least amount of time remaining.

3 counters: The counter in the middle has the least amount of time. The counter on the left has the 2nd least amount of time. The counter on the right has the most time remaining.

4 counters: From left to right, the counters go from least to most time remaining. *This view isn't supported if using the rest break or short-haul exemptions.*

The Ehubo will remember the view selected by the 5 most recent drivers.

New remarks

We've taken your feedback and improved the remarks you can leave when changing duty status.
