

EROAD LEADERBOARD

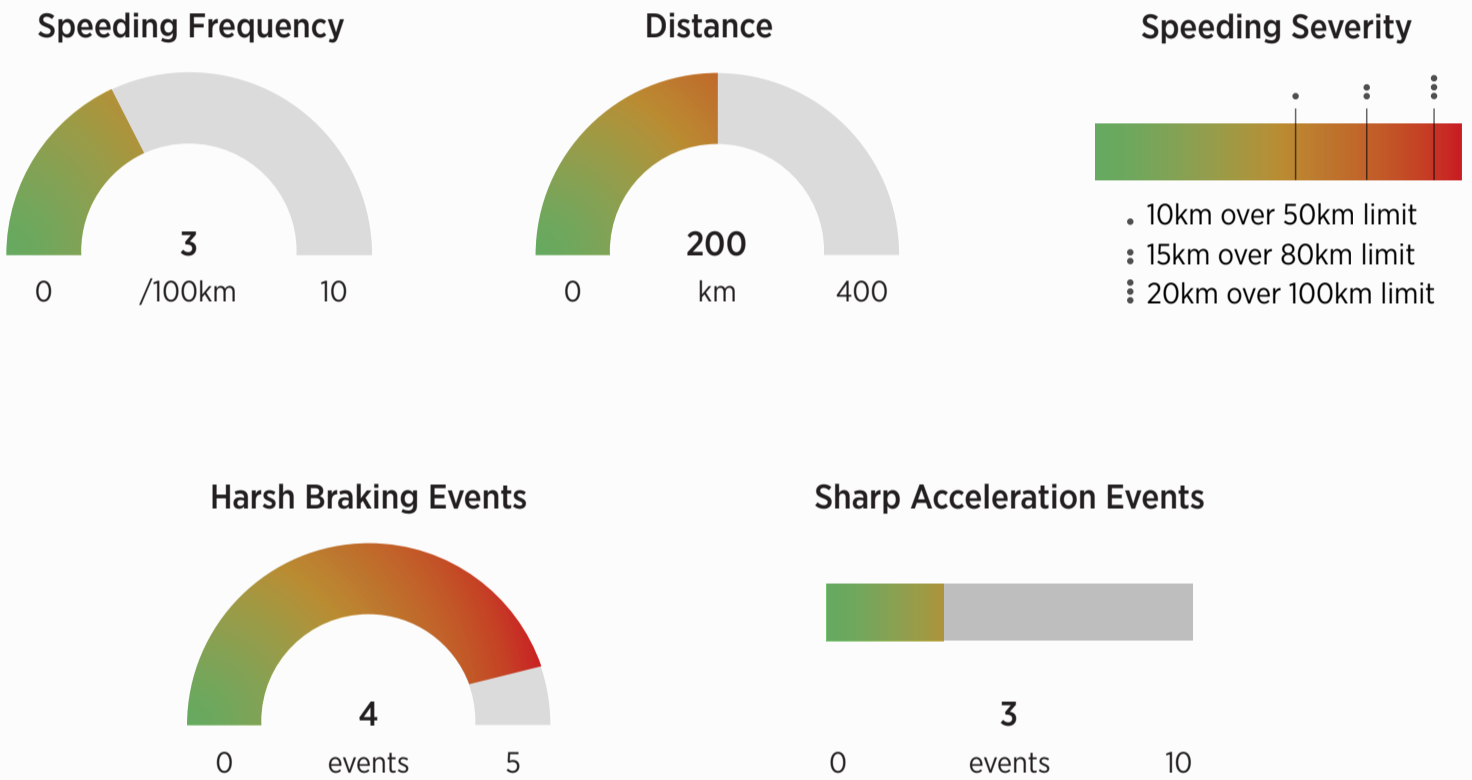

The EROAD Leaderboard gives you new insights into the performance of your fleet, vehicles and drivers. Understand how your business compares to the EROAD population, benchmark driver and vehicle performance and track improvements over time.

This guide helps you understand how the Leaderboard works, and how drivers can improve their scores.

28 Days The time a vehicle or driver is ranked over. They must have driven at least **200 km** to be ranked on the Leaderboard

Leaderboard ranks drivers based on the frequency and severity of **speeding events**, the total **distance** driven in the period, the frequency of **harsh braking** and **sharp acceleration** events.

These factors combine to give each driver or vehicle a:

- **score** which is compared against the **EROAD population**
- **ranking** and **trend** shows where they are ranked in the organisation

Your organisation is also benchmarked – a green tick means you’re in the top 25% of EROAD fleets.
